- Symfony
- Vue.js/Vuex
- Express.js
- PHPUnit
- Firebase,
- jQuery
- Bootstrap

CMS:

- Drupal 7

Tools:

- VSC
- Docker
- Jenkins
- Swagger

Storages:

- MySQL
- MariaDB
- MongoDB
- Redis

Other skills:

- Comfortable with UNIX/Linux
- Experience with VPS, PaaS (DigitalOcean, Heroku)

PROJECTS

YouTube Comments Search – *Firefox Browser Extension*

- Simple extension, which allows you to search through all comments by specific keywords on currently loaded video.
- Extension uses YouTube Data API to get results through service built in Node.js ([Link](#) to GitHub Repository)
- Matched comments including replies will be displayed in small popup window
- Results per search request can't exceed 100, including replies
- Developed using Vue.js front-end and Express.js back-end.

Grazia RS, Auto Exclusive – *Online Magazines*

- Completely rewritten code base with new architecture
- Optimized DB queries and caching using Redis
- Newsletter click tracking system and massive email sending (preventing spam) is handled without use of 3rd party providers
- Cron jobs for maintaining site and clearing unused data
- Ensured system quality via unit and functional tests
- Developed using Laravel on back-end and VueJS on front-end

Maps Saver – *Web App*

- SPA App intended for collecting trips which are described by waypoints, tracks and routes.
- Trips are stored by importing GPX files which holds given coordinates
- User communication over API is secured by JWT Token Authentication and SSL encryption
- Trip preview feature which project tracks and routes using Google Maps API for a saved trip
- Developed using VueJS(Vuex, Vuetify) and Symfony for back-end service

Unique Treatments – *eCommerce platform*

- Implemented localization, currently English and Croatian are supported
- Shopping cart and online payment functionalities with PayPal and CorvusPay
- Created wish list feature which require visitors to register and validate their email address
- Added multiple currency support
- Working on admin panel as SPA using Vuejs

COURSES

“Database Programming with PL/SQL”

“Development of start-up software applications”

SOFT SKILLS

Teamwork
Problem solving
Persistence
Communication
Fast learning

LANGUAGES

English – intermediate,
Serbian – native
